EXPERIENCE

MICROVERSE   Remote
Technical Support Engineer   *January 2023 - Present*

- Provide technical support through code reviews to improve code quality and overall performance to over 500 students.

- Give students feedback to help them grow their programming skills by assessing their code clarity, style, and best practices on project PRs which improves performances and confidence levels by 35%.

- Provide one-on-one virtual office hours to help students feel comfortable with project objectives, boost their confidence in their skills, and help them grow their professional communication skills.

- Enhance multicultural professional collaboration in globally dispersed student groups to boost success in pair-coding activities.

- Experienced major real-life working scenarios with the Review Team by creating 2 merged PRs that helped improve learning modules and project submission.

MICROVERSE   Remote
Mentor   *July 2022 - Present*

- Assist 6 students by providing technical support through code reviews and objective feedback.

- Propose improvements to code organization to improve code quality and overall performance by at least 75%.

- Provide mental support, stress management, and tips on maintaining motivation in the program which guarantees that 100% of my mentees complete the program.

- Conducting one-on-one mentorship sessions for personal and professional growth.

- Fostering collaboration and facilitating group discussions for enhanced learning.

HIGHLIGHTED PERSONAL PROJECTS   Remote
Full Stack Web Developer   *May 2022 – Present*
World Vision Clinic - This is a full-stack project, connecting Rails API to React front-end, in which users can register, create a doctor, book an appointment with the doctor, see all scheduled meetings, and delete a doctor(s). I built a group

project with the other three team members to leverage the full beauty of shipping applications with the combination of React and Rails.

- **Built with: React.js, Ruby, Ruby on Rails, and PostgreSQL (Database), Collaboration**

Accomplishments:

- Object-Oriented Programming design and implementation with Design Patterns (MVC, RESTful, etc.).

- Back-End design and implementation with PostgreSQL, and open-source packages.

- System deployment and management with Render, Netlify, etc.

- Large project experience with Agile Development, Version Control (Git), and related tools.

- Successful collaboration with 3 team members to plan and execute the development of new features, ensuring effective communication and project coordination to meet up with the deadline.

BudgetWise App - Budget-wise App is a mobile web application with authentication that allows users to manage their funds. The app features a list of transactions associated with each category so that users can evaluate spending and make informed financial decisions.

- **Built with: Ruby, Ruby on Rails, and PostgreSQL (Database), Self-learning**

Features:

- Authentication: Users can create accounts and securely log in to access their personal financial information.

- Fund Management: Users can track their expenses on groceries to gain insights into their financial situation.

- Transaction History: The app maintains a detailed history of transactions categorized by specific categories. This allows users to evaluate their spending patterns and make informed decisions.

- Category Management: Users can create and manage categories to organize their transactions effectively.

- User-Friendly Interface: The mobile web application offers an intuitive and user-friendly interface, ensuring a seamless experience for finance management.

- Data Security: The app prioritizes data security, ensuring that user information and financial data are protected using industry-standard encryption techniques.

EL-KANIS & PARTNERS   On-site
Accountant   *December 2019 - October 2021*

- Supported the tech team by learning basic programming concepts to smoothen our communication while performing my accounting rites.

- Designed financial control measures that monitor and conserve the company's losses to double-payment and overcasting payments by 96%.

- Prepared relevant documents and account statements to report the company's financial position in real-time to help foster the company's accountability to international organizations (USAID) and investors.

- Managed fund disbursements, recording, and reporting accounting activities to facilitate prompt and data-focused decision-making about the company's strengths and threats.

EDUCATION

MICROVERSE   *May 2022 – Present*
Remote Full Stack Web Development Program, Full Time

- Spending 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.

- Developing skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with remote developers across the globe.

- Built over 30+ projects with full-stack functionalities and User-centered designs for smooth access.

Federal Polytechnic, Offa   *July 2013 – August 2019*
HND/ND, Accounting
